implementation

```
public class Tree <T> {  
    Node root;  
  
    public Tree(T rootData) {  
        this.root = new Node(rootData);  
        this.root.left = null;  
        this.root.right = null;  
    }  
  
    static class Node <T> {  
        T data;  
        Node parent;  
        Node left;  
        Node right;  
  
        public Node (T data){  
            this.data = data;  
        }  
    }  
}
```
